

# McCLUN'S Lazy JM Ranch SPRING SALE

APRIL 11TH, 2024 | 1:00 PM MST  
TORRINGTON LIVESTOCK SALE BARN

# Welcome!

If you are in the cattle business long enough, you may find that the years all run together. You only remember the good years and the bad years. This past year by and large was one of those good years for most reading this. We had more rain than anyone knew what to do with, coupled with tremendous calf prices in the fall. We can only hope for continued luck for this year!

In this year's offering, we have done our very best to produce as much quality and usefulness as possible. The bulls look and act the part.

We demand that our bulls do their job for you. They must be able to walk, not be over conditioned, be handled without threat to human life, and most importantly, go breed cows. We offer a warranty that is second to none, and we honor it. Each year we have a few warranty claims, and do our best to make it right and improve on it in the future. Repeat customers don't keep coming back by accident. We intend to keep our customers returning, and do business as such.

As in the past, the bulls will sell in catalog order. No flipping back and forth for the sale order.

Again this year, we have a few PAP tested 18-Month-Old Fall Bulls that were tested by Dr. Tim Holt in Walden, CO at 8,200 feet elevation. During the 6 weeks they were on site, these bulls did quite well and we are extremely happy with their scores. We've had very few issues with our bulls performing at elevation, and stand behind them all.

Please feel free to give us a call with any questions. We look forward to seeing you on sale day if you can make it—if not, we understand how it goes. We will once again broadcast the sale on DVAuction.com, and videos can be viewed at your convenience. We have made every effort to accurately present this set in the catalog and videos. Be sure to check out our brand new website at [www.McClunRanch.com](http://www.McClunRanch.com) to view the videos and login to DVAuction.

Sincerely,

*The McCluns*

*"For I know the plans I have for you," declares the Lord. Plans to prosper you and not harm you, plans to give you hope and a future."* JEREMIAH 29:11

## Annual Spring Sale

APRIL 11TH, 2024 | TORRINGTON LIVESTOCK SALE BARN

**SELLING: 102 HEAD OF ANGUS AND POLLED HEREFORDS! 14 PAP TESTED ANGUS FALL BULLS, 2 ANGUS TWO-YEAR-OLDS, 42 ANGUS YEARLINGS, 13 HEREFORD FALL BULLS, 11 HEREFORD TWO-YEAR-OLDS, & 20 HEREFORD YEARLINGS**

### SALE LOCATION:

Torrington Livestock Market, 626 West Valley Road, Torrington, WY 82240.

**SALE DAY PHONE: 307-532-3333**

**AUCTIONEER:** Lander Nicodemus, 307-421-8141

### MOTEL ACCOMMODATIONS:

**Holiday Inn Express Hotel**  
1700 East Valley Road, Torrington, WY - 307-532-7600

**Cobblestone Hotel & Suites**  
1306 Main Street, Torrington, WY - 307-532-1033

**INSPECTION:** Cattle will be available for inspection on Wednesday April 10th, at the sale site. The cattle may be viewed at the ranch anytime prior to the sale.

**DELIVERY/TRUCKING/FEEDING:** Take your bull home sale day and receive \$100 off. OR we will deliver your bull prior to May 1st free of charge, up to 300 miles. OR we will feed your purchase until you are ready, but YOU must come pick him up, and pay feed costs incurred after May 1st. Please visit with us about your situation and we will be glad to make the best possible arrangements. Keep in mind that depending on the age of the bull and where they are going, they may need to be Trich tested.

**GUARANTEE:** All cattle selling are guaranteed to be fertile and sound. All the bulls were semen tested. First breeding season guaranteed – the period from sale date to October 1, 2024, unconditional guarantee with the exception of loss resulting from mismanagement. Bull will be replaced if a suitable replacement is available. If not, credit will be given on next year's sale for purchase price less any salvage received by owner. Notify us immediately with any problems. All claims must be submitted by December 1, 2024.

**HEALTH:** All cattle have Clean-up and Decto-Gard parasite control. All have been vaccinated with Alpha 7 + C&D at birth, Vision 7 Somnus and Bovi-Shield Gold One Shot at branding, preconditioning, and two weeks after weaning, Pinkeye, and two doses of Footrot.

**BRAND INSPECTION:** All cattle will be accompanied by proper brand inspection papers at time of shipment. A brand inspector will be available sale day.

**LUNCH:** Complimentary lunch served at noon.

**INSURANCE:** Will be available sale day through Jim Gies, a Harding & Harding agent.

### LIVESTOCK REPRESENTATIVES:

Wyoming Livestock Roundup: Curt Cox 307-630-4604  
Western Livestock Journal: Ty Groshans 970-818-6016  
High Plains Journal: Bud Mears 785-405-0376  
Livestock Plus, Inc.: Randy Rasby 308-539-6195  
American Hereford Association: Kevin Murnin 406-853-4638  
American Angus Association: Kurt Kangas 406-366-4190

**TERMS & CONDITIONS:** All cattle sell according to the standard terms and conditions of the American Angus Association and American Hereford Association.

**SIGHT UNSEEN PURCHASE GUARANTEE:** If you are unable to attend the sale you may call or send bids to any of the representatives, auctioneer, or owners. We guarantee that you will be happy with your purchase or you don't own them. We will bid for you as if it were our own money, ensuring the customer is satisfied with their purchase.

**RETAINED INTEREST:** We will retain 1/3 breeding interest or revenue interest on all bulls in the sale. Buyer owns full possession and use of all bulls in the sale, unless otherwise announced.

**LIABILITY:** All persons attending this sale do so at their own risk, legal or otherwise for their safety or the behavior of the animals. The Owners, Auctioneer, and Sale Staff assume no liability for property loss or any accidents that may occur.

**ANNOUNCEMENTS:** Announcements from the block will take precedence over the catalog.

**ONLINE BIDDING:** The sale will be broadcast live on DVAuction.com. Make sure to register prior to sale day to ensure successful bidding.

**MD NOTE:** Known carriers in the sale are listed, and bulls that have potential for the defect but have not been tested are listed as MDP.

**DELAYED BLINDNESS (DB) NOTE:** Another new genetic defect in Hereford cattle is DB. The defect comes from two carrier parents, with the offspring initially showing no apparent vision issues, but experiencing vision loss around 9-12 months. Affected cattle struggle with navigation and exhibit limited response to light stimuli. This is also a simple recessive gene, that can only be a problem if two carriers are mated together. This defect does not carry through to other breeds. Known carriers in the sale are listed, and the bulls that have potential for the defect but have not been tested are listed as DBP.

*Thank you for your consideration of our offering!*

Final thoughts:

In a world where “Business as usual is changing almost daily—the business, and the usual,” we feel there is great value in things that never change. We would like to take pride in the fact that we continue to do business the way it used to be. We know our customers by name and do business with a handshake. Many of our customers have been with us for decades.

This is not something that happens by accident. Standing behind our product and insisting on honesty and integrity is how we have made it this far. We have been selling bulls for 50 years now, and we are into the 5th generation in the family.

If there are two things we would ask for, Lord, it would be for a little rain and some real guidance in Washington. We sure could use it.

Please call with any inquiries. If you are not local to us don't let trucking be the issue. We can meet halfway or share the cost with the buyer. We are more than happy to accommodate in any matter possible. In fact, it's our job.

*God Bless!*

# EPD Definitions

**CALVING EASE DIRECT (CED)**, is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

**BIRTH WEIGHT EPD (BW)**, expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

**WEANING WEIGHT EPD (WW)**, expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

**YEARLING WEIGHT EPD (YW)**, expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

**MATERNAL MILK EPD (MILK)**, is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

**MARBLING EPD (MARB)**, expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

**RIBEYE AREA EPD (RE)**, expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

**FAT THICKNESS EPD (FAT)**, expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

**MATERNAL WEANED CALF VALUE (\$M)**, an index, expressed in dollars per head, predicts profitability differences from conception to weaning with the underlying breeding objective assuming that individuals retain their own replacement females within herd and sell the rest of the cull female and all male progeny as feeder calves. The model assumes commercial producers will replace 25% of their breeding females in the first generation and 20% of their breeding females in each subsequent generation. Traits included are as follows: calving ease direct, calving ease maternal, weaning weight, milk, heifer pregnancy, docility, mature cow weight, claw set and foot angle.

**WEANED CALF VALUE (\$W)**, an index, expressed in dollars per head, to predict profitability differences in progeny due to genetics from birth to weaning. The underlying objective being producers will retain 20% of the female progeny as replacements and sell the rest of the cull females and their male counterparts as feeder calves. Traits included are as follows (in no particular order): birth weight, weaning weight, milk, and mature cow weight.

**FEEDLOT VALUE (\$F)**, an index, expressed in dollars per head, to predict profitability differences in progeny due to genetics for postweaning feedlot merit compared to the progeny of other sires. The underlying objective assumes producers will retain ownership of cattle through the feedlot phase and sell fed cattle on a carcass weight basis, but with no consideration of premiums or discounts for quality and yield grade. Traits contributing directly to the index are as follows: yearling weight (gain), carcass weight and dry-matter intake.

**GRID VALUE (\$G)**, an index, expressed in dollars per carcass, to predict profitability differences in progeny due to genetics for carcass grid merit compared to progeny of other sires. The underlying objective assumes producers will market cattle on an above-industry-average carcass grid. Traits included in the index are as follows (in no particular order): carcass weight, marbling, ribeye area, and fat.

**BEEF VALUE (\$B)**, a terminal index, expressed in dollars per carcass, to predict profitability differences in progeny due to genetics for postweaning and carcass traits. This terminal index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase and market these animals on a carcass grid. Traits included in the index are as follows: yearling weight, dry-matter intake, marbling, carcass weight, ribeye area and fat.

**COMBINED VALUE (\$C)**, an index, expressed in dollars per head, which includes all traits that make up both Maternal Weaned Calf Value (\$M) and Beef Value (\$B) with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and sell them on a quality-based carcass merit grid. Expected progeny differences (EPDs) directly influencing a combined index: calving ease direct (CED) and maternal (CEM), weaning weight (WW), yearling weight (YW), maternal milk (Milk), heifer pregnancy (HP), docility (DOC), mature cow weight (MW), foot angle (Angle), claw set (Claw), dry matter intake (DMI), marbling (Marb), carcass weight (CW), ribeye area (RE) and fat thickness (Fat).

***Not local to us? No problem!***  
**WE CAN ARRANGE DELIVERY!**

Example: Customer lives 500 miles away. We meet halfway; no charge. OR:  
We bring purchase full distance: \$1/mile beyond 300 miles = \$200. However:  
If total purchase is over \$10,000; no charge.

*Keep in mind: We try to put together loads along a common route, so please be flexible with delivery date, but don't let distance be the issue! We will do our best to make it reasonable!*

## PAP Risk Category Flow Chart

*Timothy N. Holt, DVM*

*Lisa Herrick, Certified PAP Technician 2023*

*Location of Pap test: Walden, Colorado Elevation 8,175 feet*

**“McClun’s Lazy JM Ranch”**

**PAP Risk Factor**

**High Elevation Test Chart**

**PAP test conducted at elevation >7,500 ft. For a stay at elevation for 6 weeks**

*(75-90% Repeatable, Predictive Value)*

PAP Score	Use at Low Elev. (<4,000 ft.)	Use at Moderate Elev. (4,000-5,000 ft.)	Use at High Elev. (5,500-7,500 ft.)	Use at Extreme Elev. (7,500 ft.)
34-41	Low Risk	Low Risk	Low Risk	Low Risk
42-44	Low Risk	Low Risk	Low Risk	Low Risk
45-49	Moderate Risk	Moderate Risk	Moderate Risk	High Risk
> 50	Moderate Risk	Moderate Risk	High Risk	High Risk

- When selecting an animal based on a PAP measurement other factors besides those listed above should be considered such as genetics or pedigree, PAP EPD’s, Systolic/Diastolic pressures, breed and previous illness.
- Special consideration should be given to the amount of time the animal was exposed to elevation (>5500 ft) prior to testing. The predictability and repeatability of the PAP measurement improves with longer the exposure to higher elevation (minimum of 3 weeks is required).
- This chart is based on animals greater than 10 months of age. Testing older animals (>12 months) results in a higher predictive and repeatability measurement.
- Testing of younger animals (<10months) may result in a greater variability to the predictive and repeatability measurement.

### DEFINITIONS:

- **Repeatable or Repeatability Percent:** This is a term used to give strength to a given PAP score predicting that if a retest PAP was carried out later in life then the score would be close to or within the same category as the original measurement. For example; a PAP measurement taken below 4000 feet only has a 40% repeatable percent meaning that a repeat test only has a 40% chance of staying within the same risk category as the original test.
- **Predictive Value:** This term is closely related to repeatability percent but specifically says that the original score can accurately predict what that animal will retest in a higher elevation.
- **Risk:** Defined as the likelihood of an animal developing pulmonary hypertension themselves or being at risk for having a genetic predisposition for the disease.
